PROJECTS

- **Hotel Management-** The whole system is built in Java programming language with the help of NetBeans IDE and Also to make records available for future use it's back-end is MySQL database. This is simple yet complete hotel management system. This system performs all the necessary tasks that a hotel software application performs.
- **Resume** – Made a resume of myself using HTML , CSS and JavaScript with the help of VS Code .

INTERNSHIP

Full Stack MERN Developer Intern

(From NU Beginnings)

(February 2023 - May 2023)
